## Foreword

In reading and studying the Hershey family history from the pen of Henry Hershey, I thought it would be desirable to bring the family record of Joseph and Fannie Hershey up to date. The last record was printed thirty years ago.

As you read you will note a number before each name which indicates the generation of the name which follows.

There will probably be errors in names, births and deaths. I have tried to make it as accurate as possible.

I am deeply indebted to many of our relatives and friends for their help in making this history complete. To all I say "thank you".

May you find enjoyment and pleasure as you read these pages, and thank God for the faith of our forefathers.

Finally it is with pleasure and satisfaction that I can present this book of history of Joseph and Fannie Hershey to our friends and relatives.

J. Eby Hershey

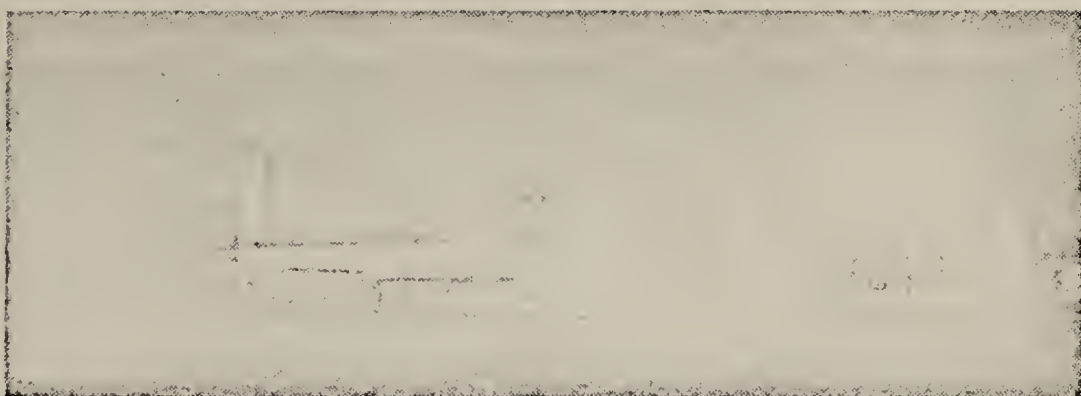

## ANDREW HERSHEY

Andrew Hershey the first generation of our Hershey ancestry to immigrate to America from Appenzell, Switzerland, came with two sons, Andrew and Benjamin, in 1719 and was followed by another son, Christian, some years later. It is unknown whether his wife ever came to America or died in Switzerland. Also we have no record of the wife of Andrew Hershey II generation.

The family record I am following shows Jacob was the fifth son of Andrew Hershey II. Jacob Hershey was born in 1742, married to Anna Newcomer, and died in 1825. They had seven children. John who was the oldest born 1772, married to Anna Horst, and died in 1850. To this union were born seven children and Joseph was the youngest child born in 1816, married to Fannie Hartman and died in 1891. This is the father of our Hershey family which I am following.

## JACOB HERSHEY

Jacob Hershey, fifth son of Andrew Hershey II and his wife, Anna Newcomer Hershey, moved with five children from Derry township, Dauphin County, to this farm in Salisbury township, Lancaster county, which is adjoining the Hershey Mennonite Church, according to a deed conveyed to his family on the ninth day of May 1792.

This farm is still in the Hershey name and is owned by a great, great grandson, Willis L. Hershey, and is tenanted by a son Melvin Hershey.

If you look to the extreme left you will note part of the Hershey's Mennonite Church and cemetery. The grounds originally came from this farm.

## THE HERSHEY HOMESTEAD

On May first, 1824, John Hershey the oldest son of Jacob Hershey and a deacon in the Hershey's Church, took this farm from his father according to a deed that was recorded. How long before this Jacob Hershey owned this farm is unknown.

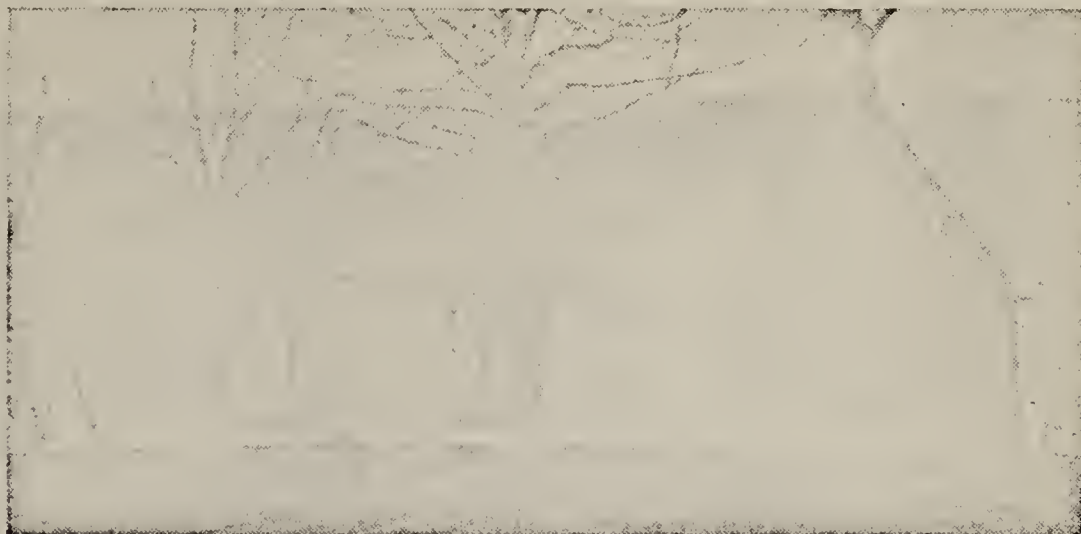

This farm is located three mile north of the farm Jacob originally settled, and is known as the Homestead farm where Joseph and Fannie Hershey raised their family.

This farm is still in the Hershey name with the sixth generation now living thereon.

## HERSHEY MENNONITE CHURCH

The church where Joseph and Fannie Hershey and their thirteen children attended, today still stands and bears the same name. This building was built in 1879 and was preceded by two other buildings built on the same site. The first was built in 1837, and the second in 1862. Before this they met in a building which was used also for school which was built in 1814, near the same site.

This congregation is served by a grandson, Martin R. Hershey, and a great grandson, Sanford E. Hershey, as pastors, and Willis L. Hershey a great grandson-in-law as deacon.

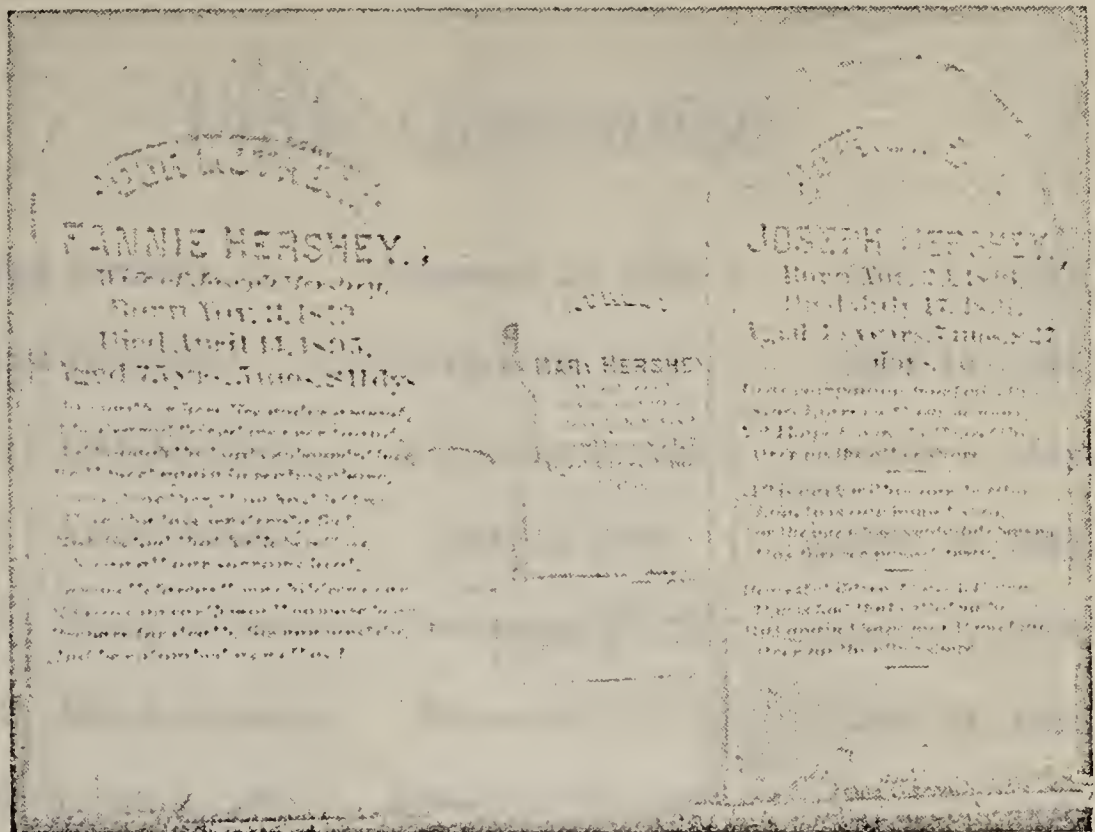

## HOLLOW SCHOOL

This school is believed to be where most of Joseph Hershey's children attended. It is still serving today the community, including some of Joseph Hershey's great, great grandchildren, while many other one room schools are fast closing to consolidation. This school is located one mile northwest of the Hershey Homestead farm.

Fannie Hartman Hershey  
Born November 3, 1819  
Died April 14, 1894  
Age 75 y. - 5 m. - 11 d.

Joseph Hershey  
Born November 20, 1816  
Died July 11, 1891  
Age 74 y. - 7 m. - 21 d.

These graves are well marked near the gate in the Hershey's Mennonite cemetery, with seven of their children buried near them. John, Margaret and Joseph, who died in childhood, are buried in the old cemetery about one half mile east of the present one, while Henry's body lies in the Mellinger's cemetery, just east of Lancaster. Elizabeth and Amanda moved with their husbands to Augusta county, Virginia, and are buried in Springdale cemetery in Virginia. These with many, many others are waiting their resurrection and appearing of our Lord Jesus Christ.

We know not what beyond may lie  
But live in humble faith  
Into a larger life to die  
And find new birth in death.

## Fifth Generation

5	Joseph Hershey	November 20, 1816	July 11, 1891
	Fannie Hartman	November 3, 1819	April 14, 1894
6	John Hershey	November 6, 1839	October 1, 1852
6	Annie Hershey	May 14, 1841	August 28, 1929
6	Henry H. Hershey	November 24, 1842	January 30, 1916
6	Moses Hershey	November 29, 1843	July 14, 1930
6	Lydia Hershey	November 23, 1845	August 26, 1923
6	Catherine Hershey	February 26, 1847	May 10, 1918
6	Joseph Hershey	August 24, 1848	September 23, 1852
6	Fannie Hershey	July 4, 1850	July 12, 1936
6	Magdalena Hershey	January 19, 1853	July 19, 1925
6	Elizabeth Hershey	February 18, 1855	December 31, 1930
6	Margaret Hershey	January 27, 1857	May 11, 1857
6	Amos H. Hershey	June 1, 1858	February 27, 1933
6	Amanda Hershey	April 22, 1863	November 1, 1957

1. General remarks: The object of this study is to determine the effect of the various factors on the rate of reaction between the two substances.

2. Materials and Methods: The materials used were the two substances and the apparatus for measuring the rate of reaction. The method employed was the measurement of the volume of gas evolved at different times.

3. Results: The results of the experiment are shown in the following table. The rate of reaction was found to be directly proportional to the concentration of the reactants and inversely proportional to the temperature.

4. Discussion: The results of the experiment are in agreement with the theoretical predictions. The rate of reaction is affected by the concentration of the reactants and the temperature.

5. Conclusion: The rate of reaction is affected by the concentration of the reactants and the temperature. The rate of reaction is directly proportional to the concentration of the reactants and inversely proportional to the temperature.

6. References: The following references are given for the purpose of information.
